## IS THIS THE END OF THE KETTLE

### YOU SAVE TIME AND SPACE

We don't just want to make your life more convenient, we also want to give you more space in the kitchen: GROHE Red™ consists of just a fitting, 4-stage filter and a boiler which can be installed unobtrusively and compactly under any standard sink, making water boilers and kettles a thing of the past.

- Making great tasting tea and coffee (filtered)
- Blanching vegetables
- Sterilising baby bottles
- Removing the skin from fruit and tomatoes
- Washing dirty pots and pans
- Cleaning knives and cutting boards
- Making instant soups

Duo Tap delivers normal hot and cold one side and kettle hot water the other (99c).

The tap fits in to one normal size tap hole, so a good retro fit as well.

99 degrees C means:-

Does not burn coffee or tea.

Gives the product and boiler full WRAS approval for commercial and new build installations.

Does not spit dangerously boiling water when being used.

Safety features:-

Cool touch spout, separate delivery pipes for kettle hot and hot/cold water

Safety handle - child proof control has extra switch when turning plus automatically switches off when released.

Finishes:-

Chrome or Supersteel.

Comes with full 4 stage filter system using Britta technology that also removes lime scale. This gives us the opportunity to pass on a 5 year guarantee including the boiler.

GROHE Water Appliances

# GROHE Blue®

Want delicious filtered water straight from your kitchen tap?  
If so, then look no further than GROHE Blue®.

GROHE Blue's class leading 4-stage filter system uses activated carbon to remove substances that impair the smell and taste to get rid of impurities such as chlorine and organic compounds which affect the taste of your water. Whilst the Ion exchange resin reduces carbonate hardness and filters out heavy metals such as lead and copper resulting in pure, great tasting filtered water - 24 hours a day!

When the filter capacity drops below 10%, the Blue GROHE Logo display blinks to remind you that it is time to order a replacement filter, always ensuring maximum use before replacement.

GROHE Blue's filters cartridges are available in three sizes, are recyclable and you'll find filter replacement is simple, fast and tool-free.

GROHE Blue\* offers a reduced carbon footprint compared to bottled water alternatives.

Find out about preferential terms for displaying outlets. Contact:

"When design makes sense"

A broad statement, but an underlying driver for the creation of our kitchen products. Striking yet simple design statements are fundamental to our approach, but share equal priority with function and quality. The Scandinavian design and premium finish of our taps shines through each time you use a Damixa product. However, on the inside our ranges are packed with great features and highly innovative functions to deliver performance beyond your expectations.

## The fusion of function and beauty; durability and desirability.

The strength of the Perrin & Rowe brand is built upon a clear understanding of the requirements in the luxury sector: product reliability, durability, quality and real value for money.

Renowned for its unrivalled quality and an exacting attention to detail, Perrin & Rowe kitchen collection includes a wide range of standard mixers and filtration taps.

Perrin & Rowe's products are outstanding examples of design excellence combined with cutting edge precision engineering. Our products are not mass produced; instead we concentrate on perfecting each individual hand-built product in our UK manufacturing facilities.
